

ML CI

IOL Delivery System

SMOOTH DELIVERY FOR ALL
HYDROPHOBIC AND HYDROPHILIC
INTRAOCULAR LENSES

ML CI is an Excellent IOL delivery system that utilizes the innovative treatment technology specifically designed and developed to enable a safer, simpler and more effective intraocular lens (IOL) delivery, which protects the IOL from damage during cataract surgery. The ML CI IOL Delivery System, packaged in sets of One, is available in a range of incision sizes. Each set contains a sterile single-use injector and a treated cartridge.

Model reference	External diameter	Clear corneal incision using wound assisted technique (dock-in)	Intra cameral incision	Recommended IOL powers
ML CI 28	1.85	2.2	2.6	less than 24.0 D
ML CI 32	2.10	2.4	3.0	Higher than 24.0 D
